

eco-friendly NRS (NATURAL RUBBER SPONGE)

MIDAS

green

• making safety sustainable •

Every pair keeps one bottle out of our oceans or landfills. The same great performance you'd expect from a regular glove with the same construction.

Reliable grip

Excellent dry and good wet grip

360° breathability

Specially formulated sponge coating provides better breathability than a crinkle latex coating

Ergonomically designed

... for improved comfort, dexterity, flexibility and tactility

90% recycled polyester

... uses less water and energy, reducing the carbon footprint and plastic waste

eco-friendly

• making safety sustainable •

Every pair keeps one bottle out of our oceans or landfills. The same great performance you'd expect from a regular glove with the same construction.

WHY?

We're committed to making safety sustainable, and consumers are increasingly demanding sustainability in the products they buy. These eco-friendly gloves are our first step in meeting that consumer demand.

Plus, with their ergonomic design and seamless construction, these gloves offer comfort, dexterity, breathability and durability.

TRUE VALUE OF THIS GLOVE

This glove is about the fundamental idea that we can make a difference in the fight to save our environment, and we can start with a single pair of gloves. If you believe in that, and your customers believe in that, then we can take our first steps on this journey together.

GENERAL PURPOSE GLOVES

MIDAS SAFETY AND SUSTAINABILITY

Supporting the **United Nations' Sustainability Development Goals (SDG)**, we have finalised our targets for 2023 around seven pillars: **People, Climate, Water, Energy, Waste, Product and Packaging**

FROM MATERIAL WASTE TO WEARABLES

PLASTIC

Unlike polyester, recycled polyester uses PET (polyethylene terephthalate) as the raw material. This is the same material that is used in clear plastic water bottles, and recycling it to create the fabric prevents it from going to landfills and oceans.

- Less soil contamination, air and water pollution
- 33-53% less energy consumption; reduces dependence on petroleum as a fossil fuel
- Gloves created from recycled polyester can be recycled over and over again with no degradation in quality, allowing us to minimize wastage

PACKAGING

Packaging and packaging material is a key area of focus for Midas Safety as we aim to reduce the waste generated and the CO₂ footprint through our Packaging value chains and materials.

Our Commitment to a Sustainable Planet

Our sustainable packaging initiatives are focused on weight reduction and ecological sourcing, based on the 5 Rs principle. We have reduced the gram per inch material (Paper and plastic) used in packaging material, use of recycled paper in product User Information (UI) sheet, use of paper carton made in combination of virgin and recycled paper and use of corrugated carton with reduced number of plies. These initiatives will not only be helpful in reducing our product carbon footprint but will also contribute towards reducing the resultant waste.

REMOVE	<ul style="list-style-type: none"> • Unnecessary packaging • Metal from packaging
REFUSE	<ul style="list-style-type: none"> • Individual packaging for bulk products • Non-compliant suppliers
REDUCE	<ul style="list-style-type: none"> • Packaging weight • Virgin paper • Plastic packaging accessories • Plastic coatings
REUSE	<ul style="list-style-type: none"> • Internal transfer packaging • Encourage customer packaging reuse
RECYCLE	<ul style="list-style-type: none"> • Recycled Paper for packaging
