

Helping Our Partners Reduce Their Carbon Footprint

Introducing the Sustainable PU Glove

CHANGING THE WORLD ONE PAIR OF GLOVES AT A TIME

We use U.N. Sustainable Development Goals (SDG) as guidelines and our commitment to responsible stewardship currently revolves around 6 of these goals:

ENVIRONMENTAL STEWARDSHIP

SUSTAINABLE PU

A 85% recycled polyester & PU version of our first-ever eco-based glove.

This unique innovation utilizes a sustainable liner containing **85% recycled polyester** plus a PU coating. The production process employs significantly less water and energy consumption along with reduced carbon footprint and plastic waste.

EVERY PAIR MAKES A DIFFERENCE

1 ×  = 

500 mL PET bottle/pair
prevented from choking
our oceans and landfills

85% RECYCLED YARN

15g/pair
VS REGULAR
PU GLOVES

GENERATES
23x less CO₂
VS COAL

Products certified to the RCS contain the recycled content that has been independently verified at each stage of the supply chain, from the recycler to the finished product.

FEATURES

- These super-sleek gloves offer maximum comfort and tactile sensitivity
- Excellent grip in all condition
- No-slip coating for secure handling of devices
- Exceptional tactile sensitivity and dexterity
- Glove is available with white liner, grey or white coating

PERFECT FOR USE IN:

Precision Assembly and Engineering, Appliance Manufacturing, Automotive Manufacturing and Mechanical Work, Handling Medical Equipment, General Maintenance, Carton handling

White: 12-6VS00-WT Grey: 12-6VS00-GY

Recycled Polyester machine knitted liner with PU palm coating. Available sizes XS-XXXL

The coating on these gloves is treated with Sanitized® antimicrobial material protection and odor-reducing technology. Sanitized® will not protect the wearer of this garment against disease-causing bacteria.

FROM MATERIAL WASTE TO WEARABLES

PLASTIC

Unlike polyester, recycled polyester uses PET (polyethylene terephthalate) as the raw material. This is the same material that is used in clear plastic water bottles, and recycling it to create the fabric prevents it from going to landfills and oceans.

- Less soil contamination, air and water pollution
- 33-53% less energy consumption; reduces dependence on petroleum as a fossil fuel
- Gloves created from recycled polyester can be recycled over and over again with no degradation in quality, allowing us to minimize wastage

PACKAGING

Packaging and packaging material is a key area of focus for Midas Safety as we aim to reduce the waste generated and the CO₂ footprint through our Packaging value chains and materials.

Our Commitment to a Sustainable Planet

Our sustainable packaging initiatives are focused on weight reduction and ecological sourcing, based on the 5 Rs principle. We have reduced the gram per inch material (Paper and plastic) used in packaging material, use of recycled paper in product User Information (UI) sheet, use of paper carton made in combination of virgin and recycled paper and use of corrugated carton with reduced number of plies. These initiatives will not only be helpful in reducing our product carbon footprint but will also contribute towards reducing the resultant waste.

REMOVE	<ul style="list-style-type: none"> • Unnecessary packaging • Metal from packaging
REFUSE	<ul style="list-style-type: none"> • Individual packaging for bulk products • Non-compliant suppliers
REDUCE	<ul style="list-style-type: none"> • Packaging weight • Virgin paper • Plastic packaging accessories • Plastic coatings
REUSE	<ul style="list-style-type: none"> • Internal transfer packaging • Encourage customer packaging reuse
RECYCLE	<ul style="list-style-type: none"> • Recycled Paper for packaging
