# Countless industries require their workers to work in the cold. We've got those workers covered.

Midas Safety's cold-protection gloves range from general purpose, to cut resistant, to chemical resistant and impact protective. We've got options to keep hands extra dry, hi-viz for low light environments, as well as our new sustainable option for those who want to help protect the planet as well as themselves.

With a variety of inserts, including Terry or Acrylic, these winter gloves will keep hands warm, with a large variety of coatings available to meet other workplace needs.

 **-20°C** SOME GLOVES HAVE BEEN TESTED AT TEMPERATURES AS LOW AS -20°C.

 The coating on these gloves is treated with Sanitized® antimicrobial material protection and odor-reducing technology. Sanitized® will not protect the wearer of this garment against disease-causing bacteria.

**Hydropellent Technology (HPT®)** is a unique proprietary coating that repels liquid and provides excellent grip in wet, dry and oily conditions. HPT® offers secure handling gloves that are lightweight, have superior grip and dexterity, whilst being supremely comfortable. HPT® coated gloves remain supple in temperatures as low as -20°C.

 **HYDROPELLENT TECHNOLOGY®**  
Superior Wet Grip
