

# Helping Our Partners Reduce Their Carbon Footprint

## Introducing the Sustainable Splendor Glove

### CHANGING THE WORLD ONE PAIR OF GLOVES AT A TIME

We use U.N. Sustainable Development Goals (SDG) as guidelines and our commitment to responsible stewardship currently revolves around 6 of these goals:

**SUSTAINABLE DEVELOPMENT GOALS**

**ENVIRONMENTAL STEWARDSHIP**

# SUSTAINABLE SPLENDOR™

## Introducing our first-ever eco-based glove.

This unique innovation utilizes a sustainable liner containing **42% recycled yarns, composed of polyester and cotton**, plus a natural rubber coating. The production process employs significantly less water and energy consumption along with reduced carbon footprint and plastic waste.

## EVERY PAIR MAKES A DIFFERENCE

\*There is an additional savings of 3 bottles worth of plastic versus our regular Splendor™

Contains 42% RCS  
Certified Recycled Yarns  
Certified by Control  
Union CU1119762

**94L/pair**  
VS VIRGIN YARNS

GENERATES  
**23x less CO<sub>2</sub>**  
VS COAL

**17g/pair**  
VS REGULAR  
SPLENDOR

**42% recycled  
yarns**

Products certified to the RCS contain the recycled content that has been independently verified at each stage of the supply chain, from the recycler to the finished product.

## FEATURES

- ISO 13997 Cut B hand protection without expensive or abrasive cut-resistant fibers
- Excellent wet and dry grip
- Absorbs sweat, keeping hands comfortable and cool

## W3-110-NL-COGR

Cotton/Polyester liner with Crinkle Natural Latex Coating. Available sizes S-XXL

## PERFECT FOR USE IN:

General Maintenance, Construction Activities, Gardening, Warehousing and Retail

Warning: These products contain Natural Rubber Latex, which may cause allergic reactions in some individuals.

EN388:2016

# FROM MATERIAL WASTE TO WEARABLES

## PLASTIC

Unlike polyester, recycled polyester uses PET (polyethylene terephthalate) as the raw material. This is the same material that is used in clear plastic water bottles, and recycling it to create the fabric prevents it from going to landfills and oceans.

- Less soil contamination, air and water pollution
- 33-53% less energy consumption; reduces dependence on petroleum as a fossil fuel
- Gloves created from recycled polyester can be recycled over and over again with no degradation in quality, allowing us to minimize wastage

## COTTON

We use pre-consumer cotton that utilizes cotton scraps left over while manufacturing products, and thus we are able to repurpose them into something useful.

- 24% less water consumption than virgin cotton
- Minimizes landfill waste
- Significant savings of natural resources and reduced pollution from pesticides used in agriculture
- Energy and the dye used is reduced by using a product that has already been processed

## PACKAGING

Packaging and packaging material is a key area of focus for Midas Safety as we aim to reduce the waste generated and the CO<sub>2</sub> footprint through our Packaging value chains and materials.

### Our Commitment to a Sustainable Planet

Our sustainable packaging initiatives are focused on weight reduction and ecological sourcing, based on the 5 Rs principle. We have reduced the gram per inch material (Paper and plastic) used in packaging material, use of recycled paper in product User Information (UI) sheet, use of paper carton made in combination of virgin and recycled paper and use of corrugated carton with reduced number of plies. These initiatives will not only be helpful in reducing our product carbon footprint but will also contribute towards reducing the resultant waste.
