

Workwear Collection 2023–2024

ABOUT US

Midas Safety was established in 1977 and is now represented in over 56 countries worldwide. We are one of the leading manufacturers of safety products, including hand protection, workwear clothing, technical yarns, and fabrics. Our safety solutions can be tailored to meet the unique needs of different work environments and industries. We develop our products with passion and expertise, and we are the go-to manufacturer for PPE needs for suppliers in the industrial, manufacturing, construction, oil and gas, healthcare, corporate, and other sectors.

We have created an innovative portfolio featuring a diverse selection of yarns, fabrics, and protective garments. Our range comes with a variety of features, including hi-visibility, flame retardance, arc flash protection, weather protection, cut resistance, and other design-related features to cater to the unique demands of workers across the globe.

We are committed to providing our customers with the highest quality safety products. All of our products are rigorously tested to ensure that they meet the most stringent safety standards. We also offer a wide range of support services to help our customers choose and design the right products for their needs.

We hope that this catalog will give you a good overview of our product range and our commitment to quality and safety. We look forward to working with you to meet your workwear needs.

WEARABLE TECH

REDDY ACTIVE LIGHT JACKET

DESCRIPTION:

Midas Safety's Red Hi-Vis Active light jacket is a wearable tech solution that is designed to provide active protection in low-light conditions. The jacket is equipped with an integrated Active light module that emits light through optic fibers encased in a textile coating, ensuring active protection. Unlike retroreflective safety elements, the side-emitting optic fibers provide 360° visibility in all directions for up to 3 kilometers. The textile-coated optic fiber's properties allow for easy sewing into textile products. The jacket is ideal for workers who require protection in low light conditions and can be used in a variety of industries such as construction, mining, and transportation.

FEATURES:

Breathable and comfortable fit
Spacious front pockets
Visibility in all directions up to 3 kilometers
Suitable for all industries where poor visibility is part of the job
Shell fabric is 50HL passed
Homogenous lighting along the entire length of the optic
Up to 34 hours of operation on a single charge

FABRIC:

Shell Fabric: 65%Polyester, 35%Cotton, 4/1 Satin, 335 GSM

LUMEN HI-VIS JACKET

DESCRIPTION:

The Midas Safety Lumen Jacket is designed to keep you safe and visible in low-light and cold weather conditions. It features Active Lighting Technology that provides 360° visibility in all directions for up to 3 kilometers, making it perfect for those who need to work in low-light and cold weather conditions. The integrated Active Lightening Kit has a unique optic fiber lighting system that emits light through optic fibers encased in a textile coating, ensuring active protection. The Lumen Jacket is also industrial-wash tested, durable, and flexible, with 60 hours or more of operating time. It features detachable sleeves for adjustable ventilation, an ample storage pocket at the front, and a Hi-Vis yellow exterior with quilting inside and segmented tapes and accents to keep the wearer highly visible and dry. Additionally, the jacket has reflective segmented tape, a ribbed waist, multiple storage pockets, a sleeve pocket, and a hood that can be stored inside the collar zipper.

FEATURES:

Detachable Sleeves
Mesh-ventilated back pocket
Segmented reflective tape
Ribbed waistband
Multiple storage pockets
Sleeve pocket
Visibility up to 3 km
Hood stows inside collar zipper

FABRIC:

Shell Fabric: 94% Polyester, 6% Spandex TPU Softshell Fleece, 240 GSM

Contrast: 100% Polyester + TPU 150D Soft shell, 220 GSM

Rib: 97% Cotton 3% Spandex, 325 GSM

Lining: 100% Polyester Taffeta, 180 GSM

ADVANCE TECH JACKET

DESCRIPTION:

Midas Safety's Advanced Tech Jacket is a high-performance softshell jacket integrated with advanced heat-sensing technology, making it ideal for low-temperature working conditions. The jacket is crafted using durable softshell textile outer with taffeta insulation to keep you warm. The integrated smart heating system features a programmable module that can be autoregulated with temperature control sensors. The Advanced Tech Jacket has an athleisure aesthetic, with side mesh vents, segmented reflective tapes, and piping. The jacket features multiple front pockets for storage.

FEATURES:

Centre front closure with full-length DWR zipper
Mesh-lined Armpit vents for ventilation
Detachable and toggle adjustable hood
Velcro adjustable cuff
Segmented reflective tapes and reflective piping
Electro-textile fabric
Autoregulated sensors & manual mode to optimize jacket temperature
Heating autonomy: 8h
Connectivity: Bluetooth 5.3
Heating electrical power: 18W

FABRIC AND MATERIALS:

Shell Fabric: 94% Polyester, 6% Spandex TPU Softshell Fleece, 240 GSM

Lining: 100% Polyester, 120 GSM

HEAT SENSING-ENVIROARMOR JACKET

DESCRIPTION:

The Heat-Sensing Enviro Armor Jacket is the perfect outdoor work jacket for cold weather conditions. The jacket features an integrated heating kit made with eco-friendly DWR fabric materials, an athleisure design, stretch material, sleeve adjusters, and front zipper pockets. The built-in heating module will keep you warm, while the DWR shell and recycled fleece-bonded softshell will keep you dry and comfortable. The back overlapping mesh vent and breathable materials will help you take on rain, cold, mud, and dirt without sacrificing style or functionality.

FEATURES:

- Stretchable, Eco-friendly materials
- DWR zippers, detachable hood
- Built-in temperature controller with 3 heat settings
- Heating elements on collar, back and chest
- Overlapped mesh vent at the back

FABRIC:

Shell fabric: Recycle Nylon, 18% Spandex PU membrane, recycle stretch fleece, 400 GSM

Contrast: 100% Recycle Polyester TPU Ripstop, 200 GSM

Contrast: 100% Polyester + TPU 150D Soft shell, 280 GSM

Lining: 100% Polyester Taffeta

TORMUND2 ADVANCE TECH JACKET

DESCRIPTION:

Tormund2 is a multi-feature thoughtfully designed jacket combining the High visibility with a modern fit and stylish look. It offers industrial launderable stretch which is durable and comfortable. It comes with quilting option to keep wearers warm in adverse weather conditions. Our Tormund2 Advance Tech Jacket is integrated with Smart Led Visibility technology, offering programmable module integrated into the garment to make the worker visible at a distance in low light conditions. The smart fabric lightening patches are attached at the back and sleeves.

FEATURES:

Dynamic module which is programmable to set up lighting signals based on worker activity.

Allows you to be highly visible without being illuminated by a lighting source.

Smart light patched on sleeves and back, Reflective tapes for Hi-visibility

The Smart tech in the garment uses fiber and sensor technology to automate and optimize light cycles to provide better signaling protection.

Warning of danger through different lighting scenarios created by the user: Static detection, Motion detection, Fall detection.

Electronics can store and enable data analytics Features

Lighting autonomy: 18h

Washable and DWR shell fabric

Front bellow pockets for storage

High visibility over a long distance

Detachable quilt and fur hood lining to keep the inside

temperature warm and comf

FABRIC:

Shell fabric: 63% Cotton, 34% Polyester, 3% EOL 275gsm | 8.1 oz

Quilting: 100% Polyester 120 gsm | 3.5 oz

LIT-ARMOR FR VEST

DESCRIPTION:

Stay safe and visible in dangerous environments with the Lit-Armor High-Visibility FR Vest. This lightweight, flexible vest features FR active lighting technology, with integrated FR Lightning piping that is visible from up to 3 kilometers away. The LED lights can be turned on and off with a power button and have three different light modes to choose from.

The vest is also lined with Meta Aramid lining, providing excellent heat and flame resistance. Its soft texture and flexibility make it ideal for use in low-lit or hot temperatures.

FEATURES:
